- to be of use, the check list must be product- and method-specific. The value of a general check list that would need to be tailored by each company may be considered in the future. At present, the Working Group is not ready to address the issue of developing a check list; and
  - the Working Group will gauge the extent of current use of check lists through the MB/APSD Failure Questionnaire, and may re-visit this issue after survey results are analyzed.

- The GCIP paper should be revised to include final comments discussed during the teleconference, and forwarded to the DPTC and SC for consideration.
  - With the approval of the DPTC and SC, the GCIP paper could potentially be submitted for publication in the upcoming special issue of the *Journal of Aerosol Medicine* focusing on cascade impactors.
  - The Questionnaire on MB/APSD failures should be finalized as discussed during the teleconference and forwarded for comments to the DPTC.
  - The Questionnaire should include a new question on use of check lists for impactor runs. After survey results are analyzed, the WG may re-visit the issue of check lists.

57 **IV. NEXT TELECONFERENCE/MEETING**

58 The next teleconference of the PSD Mass Balance Working Group is scheduled for  
59 **Friday, 8 November 2002 at 9:00 AM (US ET)/14:00 (UK Time).**
