

**Summary Minutes of the DTC Teleconference
April 15, 2010**

Chair read the admonition statement.

Container Closure WG-

- Blister report comments have been received and will be incorporated into the document.
- Bottle report is almost finished and will come to the DTC soon, then the WG will complete the ASTM method.
- Still considering future work for the group.

Stability Shelf Life WG- Liaison will check in with them as there does not seem to be a lot of activity right now. Work is still being done on the white paper.

PODP WG-

They have been contacted about some of their Tox Team members working with FDA on some issues.

Action Items: A brief is being prepared for the FDA by the WG, and DTC Chair will contact Steering Committee Chair to seek approval for this group to work directly with the FDA.

Steering Committee Report-

- MTC is putting together a couple of WG proposals as off shoots from the PQRI conference. One is on Transdermals and the other concerns Excipients in the Supply Chain. They presented their concept at the last SC meeting and they were approved in concept. Next steps are for further development of the ideas. Several DTC members were interested in seeing the proposal once finalized and if there is a role that the DTC might play in the research.

No further business was brought forward so the meeting adjourned.
